TECHSAFE
AUTOMOTIVE SEATING SOLUTIONS

SIDEFOLD

THE SIDEFOLD ADVANTAGE

To maximise passenger numbers, the SideFold seat flip-folds to the side wall when wheel chair space is needed. Gas struts and foot activated latching systems make it easy for passengers, guides or OTs to fold the seat with minimum effort and fuss. The light weight seat frame is very compact when stowed - the perfect solution for wheelchair access vans and taxis.

- Gas assisted flip-fold action
- Foot activated release levers
- Double seats only
- Fitment to Driver side only
- Light weight frame for easy install
- Child restraint anchorages
- Genuine matching interior trims
- Head restraints standard
