SAFER CREW TRANSPORT

Techsafe Interline crew cab seating improves crew safety, comfort and compliance in Isuzu N & F Series vehicles.

Our seating upgrades replace standard OEM bench seating with individual seating configurations, creating a safer, more comfortable and practical crew cab. Designed for integration by body builders and vehicle converters, the Interline range is trusted across emergency services, fleet, mining and specialist vehicle builds throughout Australia.

★★★★★

"We've delivered a number of Isuzu crew cab projects with Techsafe Seating and have always found the team easy to work with. Their products are well designed, fit the vehicles properly and give our customers a quality outcome."

Typical Applications

- Emergency services vehicles
- Service and utility fleets
- Mining and resources vehicles
- Government and council fleets
- Specialist vehicle builds

WHS STARTS WITH PROPER SEATING

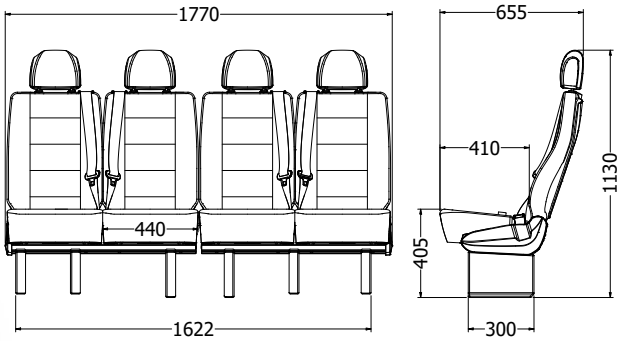

Individual seating with improved support and seating posture can help reduce fatigue during long-distance travel, particularly in emergency services, utility and mining applications.
